Expectations ...*

WORLD BRAIN CENTER & RESEARCH INSTITUTE

World Brain Center is a dream come true. It was the dream of Dr. Neelesh Tiwari, the founder of the Hospital, to create an institution would provide Quality Health Care and clinical excellence in the field of Psychiatry, Psychology, Neurology & Rehabilitation. As the name depicts, WBC&RI is one of the rare institutes dedicated to all the disorders of the brain. Though we **excel in the fields of Psychiatry, Psychology, Alcohol & drug de-addiction, Rehabilitation and Neurology**, nevertheless we also keep in mind the need of other ancillary services required by our patients. At the heart of our institute is an acute focus on quality, medical excellence and service excellence. **While most Hospitals treat the illness, we at World Brain Center treat individuals.** Our team serves as a competent, compassionate, innovative and respectful treatment provider.

A hand is shown holding a small, dark object, possibly a pen or a small tool, positioned above the letter 'U' in the title.

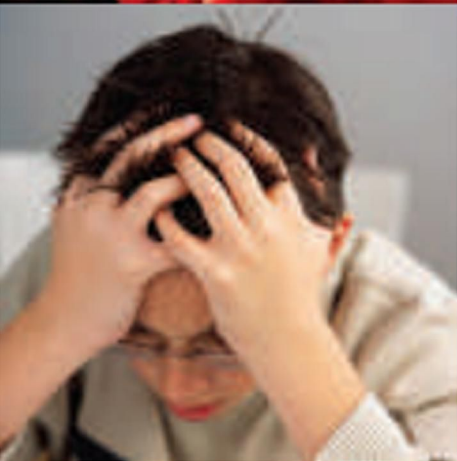

OUR VISION

World Brain Center is committed to providing world class health care services at the most affordable cost in the field of Brain related problems.

Our vision is to achieve excellence in medicare through efficient services, dedicated work and humane touch.

We believe that mending a life means treating the person as a whole physically, mentally, emotionally and spiritually.

Long standing stigma attached to Psychiatry has led to negligence and careless attitude towards it by the society and health care professionals. Keeping in mind the need of the nation WBC & RI will be opening It's branches at places like Azamgarh (U.P), Patna (Bihar), Sirsa (Haryana), Guwahati, Indore(M.P) and Goa.

FACILITIES

- 24-hours Pharmacy , Pathology Lab.
- 24 hours Ambulance facility.

De-Addiction

Healthy+Happy+Sober

3 words, 6 Steps, 30 days=A new Beginning

6 STEPS

1. Assessment of illness and motivation level.
2. Acute detoxification Phase
3. Stabilization phase (Physical + Mental)
4. Maintenance phase (Physical + Counseling)
5. After care. (Regular Follow up is the crux)
6. Relapse prevention (Educate family members to handle those situations)

We are experienced in treating dependencies of various types including alcohol, cocaine, opioids (smack, heroin etc.), solvents (ink remover), prescription pain killers, benzodiazepines, alprazolam, marijuana etc.

The type of treatment a patient receives depends on many factors like the amount and frequency of use, prior treatment history and motivation to change.

All patient care is individualized and includes input from physicians, nurses and therapists. The treatment team meets regularly to monitor each patient's progress and educate patient & their care givers about the disease concept.

All levels of care prepare patients to return to independent living.

OUR U.S.P.

- Services provided by experienced doctors assisted by a trained staff.
- Individual attention and consideration for each patient. (Every patient is a unique individual who requires some specific therapy i.e. **patient tailored therapy.**)
- Utilization of latest therapies, technology and equipments.
- Honest services with a humanitarian touch.
- A belief thatWE CAN.....
